

SMASIS DIVISION TECHNICAL COMMITTEE AWARD DESCRIPTION

Exact/full Award Title: Energy Harvesting Best Paper Award

Awarding TC: Energy Harvesting

Award Description:

The EHBP Award recognizes significant contribution to published research advancements in the field of energy harvesting technologies. Papers will be judged according to their overall quality, originality, and impact.

The nominated journal paper should be closely related to the topics of energy harvesting. The awardees can be researchers around the world working in related fields.

Eligibility:

Nominated papers may be published in any journal publication during the last calendar year. Papers must be assigned to an issue during the last calendar year.

Basic Timeline / Critical Dates: See common timeline provided by the Division.

Nomination Process: If you are a SMASIS Division Senator, please email the nomination to the TC Award POC. Please provide a PDF, and the complete paper citation information including DOI number.

Evaluation Criteria

The eligible papers will be evaluated and ranked by at least four reviewers. The paper with the highest rank wins. Papers will be judged according to their overall quality, originality, and impact. Reviewers will be selected and invited from those active members in the TC or other senior researchers in the related field. The conflict of interest in any nominated paper must be eliminated.
